

A young girl with braided hair is smiling and holding a blue VR headset. The background is a classroom setting with other students and desks, overlaid with a geometric pattern of overlapping triangles in shades of brown and orange.

BRING LEARNING TO LIFE

Build and launch immersive educational experiences

SchooVR is a cloud-based WebXR platform that enables teachers and students to create immersive educational experiences on any device through browser-agnostic building tools. Utilizing the latest WebXR technology, it supports both AR and VR in the browser, making it accessible on a wide range of devices including Chromebooks, laptops, tablets, and virtual reality goggles.

SCHOOVR FEATURES

Teacher created resources

Browse hundreds of curated immersive experiences that are packed with educational material.

Lesson plans

Download hundreds of lesson plans which save educators valuable planning time.

Browser agnostic

Access SchooVR's platform using any smart device including Chromebooks, tablets, laptops or virtual reality goggles.

Launch & guide

By clicking a button, teachers can initiate an interactive experience that students can join. The teacher mode allows instructors to explore the content, while the discovery mode lets students immerse themselves.

Tour creator

With access to thousands of licensed panoramas, teachers can choose from a wide range of scenes and locations, and add linked content such as points of interest, audio, and information. Teachers and students can also upload their own panoramas and videos.

3D explorable scenes

Teachers and students can use our building tools to create and explore amazing 3D immersive experiences.

SchooVR Software

SchooVR is designed to be accessible both online and offline. The software can be easily downloaded and installed on a wide range of devices, including Pico, DPVR and Magellan Android devices.

SCHOOVR VERSUS THE REST – A QUICK COMPARISON

SchooVR Software	Competing Systems
Includes hundreds of curated experiences created by teachers – including lesson plans, quizzes, and assessment activities.	Lack curriculum aligned content, lesson plans and assessment resources.
Tour Creator with 1000s of panoramas and videos. Upload 360 videos and panoramas.	Existing Tour Creators only have an upload function and lack panorama choice.
Launch and guide students in real-time. Control what students view – change panoramas, show POIs or send presentations in VR. Student discovery mode allows students to go on a learning journey.	Lack of launch and guide features including the ability to control what students view or discovery mode.
Gain access to our platform directly via your browser, or opt to download the SchooVR Software for both offline and online access. Our student viewer applications are compatible with a variety of devices, including Android, Pico, DPVR, and iOS.	Accessible only by downloading software.

SCHOOVR BENEFITS

Extend learning

Enhance the learning experience by leveraging multiple devices. By utilizing a laptop or Chromebook in tandem with VR goggles, students can create captivating educational experiences. This approach elevates learning by making it both purposeful and engaging, resulting in a more fulfilling educational journey for students.

Reduce teacher planning time

Educators can easily launch or customize a vast array of pre-designed learning experiences, tailored to their curriculum or schemes of work. Our lesson plans, developed by experienced teachers, offer a plethora of captivating ideas to help enhance classroom engagement.

Reliable and easy to use

SchooVR has been designed with both teachers and students in mind, making it an ideal platform for educational use. Its user-friendly interface facilitates effortless implementation in any classroom or school setting. Moreover, our administrator portal enables school administrators to easily add teachers and access valuable school analytics.
