Quick Start Guide

PICO G24K & G3

SCHOOVR

Instructions for accessing the SchooVR platform

To begin use, follow these instructions, keeping in mind the platform is intended to work both online and offline and can be accessible using any smart device including your laptop or desktop computer.

The Pico headset is tailored for educational purposes. The headset offers a safe learning experience with an array of unique attributes ideal for education, such as efficient offline usage and massive internal storage. The integrated touch buttons, in addition to the handheld Bluetooth controller, offers versatile and intuitive control options, enhancing the learning experience for students.
